Description

给定两个整数 n, m,求 k 元组 $(a_1, a_2, ..., a_k)$ 的个数,满足 $a_1, a_2, ..., a_k$ 为正整数, $\sum_{i=1}^k a_i = n$,且 $a_1, a_2, ..., a_k$ 均不是 m 的倍数。

Input

共一行,三个正整数 n, m, k。

Output

共一行,为k元组的个数,答案对 998244353 取模

Sample Input

5 3 3

Sample Output

3

Data Constraint

对于 30% 的数据, $n \le 2000, k \le 3$ 对于 50% 的数据, $n \le 10^{18}, m \le 2000, k \le 3$ 对于 70% 的数据, $n \le 10^{18}, m \le 5000, k \le 20$ 对于 100% 的数据, $n \le 10^{18}, m \le 5000, k \le 2000$
